Above are some of the terms used to describe homeless people in *Shelter*. Read them carefully then answer the following questions:

1. What do these terms tell you about the way homeless people can be viewed – what impression is created of them?
2. Can you think of any other terms that are used to describe homeless people in a negative way?
3. Why do you think some people feel this way about the homeless?
4. Draw an alternative chart, then label it with terms that present homeless people in a *sympathetic* way.
